

Dear Sirs:

I have been notified that the FCC is considering a change that will lessen the effectiveness of the Indiana Telephone Privacy Law. I am writing to have my side of the story heard. I was receiving between 3 to 6 unwanted calls a night. I am being interrupted from time that I get to spend with my family to answer unwanted phone calls. I also have elderly parents that I have to worry about some scam artist talking them into something.

After I and my parents have been put on the No Call list, the unwanted telephone calls have stopped. I am not interrupted by an unwanted phone call when I am in the middle of something with my family. I still have to deal with junk mail but I can handle that when I am ready. If we could control the junk mail as well as we have the telephone with the Indiana Telephone Privacy Law I would sign up.

Do the people of Indiana a service and do NOT change the Indiana Telephone Privacy Law. This Law is serving us well.

Thank you for your time.

Michael Daeger
